### DESCRIPTION

The COS collection was designed to create brassware that was both modern and classic to suit any style of bathroom.

This COS thermostatic 2 way bar valve in chrome will work perfectly if you're after a more traditional look to your bathroom.

This thermostatic bar valve has 2 outlets which allows it to control both a shower head and a shower handset. The left handle changes which component is on, and the right handle controls the water temperature.

Pair it with a shower hose, rigid riser rail and a COS slim or 3 function handset.
