

# SHOWER ENCLOSURES

## AFTERCARE INSTRUCTIONS

Shower enclosures should be cleaned with soap and water regularly. This is particularly important in hard water regions. Cleaners of an abrasive nature should not be used. Care should be taken to avoid contact with strong chemicals such as organic solvents and strippers. Glass cleaners can be used with caution. Wipe down the shower enclosures of excess water after each use on the glass and the metallic parts.

## GUARANTEE

There is a 10-year guarantee on shower screens and enclosures supplied by **Saneux** against manufacturing defects with the exception of seals and metallic parts which carry a 12-month guarantee.
